Section 5. Fire Fighting Measures

Flammability Classification: *Flammable pursuant to CFR 16, Ch II Subchapter C, part 1500.45.*

Aerosol Level: **Aerosol Level 2** (REF: to NFPA 30B, Section 1-7 of August 6, 1998). Code for the Manufacture and Storage of Aerosol Products.

Unusual Fire & Explosion Hazards: Aerosols may burst at temperatures above 120 degrees F. Contents under pressure. Cool uninvolved containers to prevent possible bursting.

Extinguishing Media: Use extinguishing agent suitable for type of surrounding fire.

Fire Fighting Instructions: The use of self-contained breathing apparatus is recommended for fire fighters. Fight fire upwind. Containers exposed to intense heat from fires must be cooled with water to prevent vapor pressure buildup which could result in container rupture. Keep containers cooled with water and remove them from danger if it can be done with minimal risk. Aerosols can be projectiles when bursting. If aerosols are bursting, stay clear until bursting is complete.

Section 6. Accidental Release Measures

Large spills:

Keep sources of ignition and hot metal surfaces isolated from spill. Stay upwind and away from spill/release. Isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Wear appropriate protective equipment including respiratory protection as conditions warrant. Water may be useful in minimizing or dispersing vapors. Keep out of water supplies.

Section 7. Handling and Storage

Handling: Contents under pressure. Handle as to avoid puncturing container(s). When used as intended, no additional protective equipment is necessary. Use chemical goggles if likelihood of eye contact. Wash unintentional residue with soap and water.

Storage: Store aerosol containers in cool, dry, well-ventilated areas away from heat and direct sunlight. Avoid temperatures above 120 degrees F. Keep away from any incompatible material (see section 10). Protect container(s) against physical damage. To avoid unintentional spraying keep protective cap in place when not in use.

Section 8. Exposure Controls/Personal Protection

Engineering Controls: A well ventilated room with adequate air circulation. Use local and general exhaust ventilation to effectively remove and prevent buildup of vapors/mist generated from the handling of this product.

Respiratory: If used with adequate ventilation, no protective equipment is necessary.

Skin: Not required based on the hazard of the material.

Eye/Face: While contact with this material is not expected to cause appreciable irritation, the use of approved eye protection to safeguard against potential eye contact is considered good practice.

Other Protective Equipment: A source of clean water should be available in the work area for flushing eyes and skin. Impervious clothing should be worn as needed.

Section 9. Physical and Chemical Properties.

OSHA HAZARD COMMUNICATION STANDARD

This product is not a "Hazardous Chemical" as defined by the OSHA Hazard communication Standard, 29 CFR 1910, 1200.

POTENTIAL HEALTH EFFECTS **Eye Contact:** May cause eye irritation. **Skin Contact:** Essentially nonirritating to skin. **Skin Absorption:** Prolonged skin contact is unlikely to result in absorption of harmful amounts. **Inhalation:** No adverse effects are anticipated from inhalation. **Ingestion:** Small amounts swallowed incidentally as a result of normal handling operations are not likely to cause injury; however, swallowing larger amounts may cause injury.

3. Hazardous Composition Information

COMPONENT CAS# AMOUNT

NONE KNOWN

4. First-Aid Measures

Eye Contact: Flush eyes thoroughly with water for several minutes. Remove contact lenses after the initial 1-2 minutes and continue flushing for several additional minutes. If irritation, burning or harmful effects occur, consult a physician, preferably an ophthalmologist. **Skin Contact:** Wash skin with plenty of water. **Inhalation:** No emergency medical treatment necessary. **Ingestion:** If swallowed, seek medical attention immediately. Do not induce vomiting unless directed to do so by medical personnel. **Notes to Physician:** No specific antidotes. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.

Product Name: ColourFix3 Leave-in Conditioner Issue Date: 09/10/12
REFERENCE:ES41-150B

5. Fire Fighting Measures

Extinguishing Media: Water fog or fine spray. Dry chemical fire extinguishers. Carbon dioxide fire extinguisher. Foam. **Fire Fighting Procedures:** Keep people away. Isolate fire and deny unnecessary entry. Use water spray to cool fire exposed containers and fire-affected zone until fire is out and danger of reigniting has passed. Fight fire from protected location or safe distance. Consider the use of unmanned hose holders or monitor nozzles. Immediately withdraw all personnel from the area in case of rising sound from venting safety device or discoloration of the container. Burning liquids may be extinguished by dilution with water. Do not use direct water stream. May spread fire. Hand held dry chemical or carbon dioxide extinguishers may be used for small fires. Move container from fire area if this is possible without hazard. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage. **Special Protective Equipment of Firefighters:** Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance. **Unusual Fire and Explosion Hazards:** Container may rupture from gas generation in a fire situation. Violent steam generation or eruption may occur upon application of direct water stream to hot liquids. **Hazardous Combustion Products:** During a fire, smoke may contain the original material in addition to combustion products of varying composition, which may be toxic and/or irritating. Combustion products may include and are not limited to: Carbon monoxide, Carbon dioxide.

6. Accidental Release Measures

Steps to be taken if material is Released or Spilled: Contain spilled material if possible. Collect with vacuum equipment. Collect in suitable and properly labeled containers. Attempt to absorb or neutralize by adding materials such as Sand, Vermiculite, or Soda Ash. See Section 13, Disposal Considerations, for additional information. **Personal Precautions:** Isolate area. Keep unnecessary and unprotected personnel from entering the area. Spilled material may cause a slipping hazard. Material becomes more slippery when wet. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection. Refer to Section 7, Handling, for additional precautionary measures. **Environmental Precautions:** Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See section 12, Ecological Information.

7. Handling and Storage

General Handling: Avoid contact with eyes. Wash thoroughly after handling.

See Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION.

Storage: Store at 45 -76 degrees F (4 – 25 C), away from heat and sunlight. Store in accordance with good manufacturing practices. See Section 10 for more specific information. Product stored sealed and unopened at these temperatures may last from 12-24 months, depending on the product.

Chemical protective gloves should not be needed when handling this material. Consistent with general hygienic practice for material, skin contact should be minimized. **Respiratory Protection:** Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, wear respiratory protection when adverse affects, such as respiratory irritation or discomfort have been experienced, or where indicated by your risk assessment process. For most condition no respiratory protection should be needed; however, if discomfort is experienced, use an approved air-purifying respirator.

Engineering Controls Ventilation: Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations.

5. FIRERIGHTING MEASURES

Flashpoint & Method: Not applicable

Autoignition Temperature: Not applicable

Flammability Limits:	Lower Explosive Limit (LEL):	NA	Upper Explosive Limit (UEL):	NA
----------------------	------------------------------	----	------------------------------	----

Fire & Explosion Hazards: This product is not flammable; however, when involved in a fire this product may decompose to form toxic gases (e.g., CO, CO₂, and NO_x).

Lower Explosive Upper Explosive

Extinguishing Methods: Water Fog, Foam, Dry Chemical CO2

Firefighting Procedures: As in any fire, wear MSHA/NIOSH approved self-contained breathing apparatus (pressure-demand) and full protective gear. Keep containers cool until well after the fire is out. Use water spray to cool fire-exposed surfaces and to protect personnel. Fight fire upwind. Avoid spraying water directly into storage containers because of danger of boilover. Prevent runoff from fire control or dilution from entering sewers, drains, drinking

water supply, or any natural waterway. Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies.

6. ACIDENTAL RELEASE MEASURES

Spills: before cleaning any spill or leak, individuals involved in spill cleanup must wear appropriate Personal Protective Equipment. For small spills (e.g., <1 gallon) wear appropriate personal protective equipment (e.g., goggles, gloves). Maximize ventilation (open doors and windows). Remove spilled material with absorbent material and place into appropriate closed container(s) for disposal. Dispose of properly in accordance with local, state and federal regulations. Wash all affected areas and outside of container with plenty of warm water and soap. Remove any contaminated clothing and wash thoroughly before reuse. For spills \geq 1 gallon, deny entry to all unprotected individuals. Dike and contain spill with inert material (e.g., sand or earth). Transfer product to containers for recovery or disposal and solid diking material to separate containers for proper disposal. Remove contaminated clothing promptly and wash affected skin areas with soap and water. Keep spills and cleaning runoffs out of municipal sewers and open bodies of water.

7. HANDLING & STORAGE INFORMATION

Work & Hygiene Practices: **Do not eat, or drink while handling products.**

Storage & Handling: Use and store in a cool, dry, well-ventilated location (e.g., local exhaust ventilation, fans). Keep away from excessive heat. Keep away from incompatible materials listed in section 10. Do not damaged or unmarked containers or storage devices. Keep away from children at all times!

Special Precautions: Spilled material may present a slipping hazard if left unattended. Clean all spills promptly

8. EXPOSURE CONTROLS & PERSONAL PROTECTION

Ventilation & Engineering Controls:

Use with adequate ventilation (e.g., open doors and windows, local exhaust ventilations). Ensure appropriate decontamination equipment is available (e.g., sink, safety shower, eye-wash station). When working with large quantities of product, provide adequate ventilation (e.g., local exhaust ventilation, fans).

Respiratory Protection: No special respiratory protection is required under typical circumstances of use or handling. In instances where vapors or sprays of this product are generated, and respiratory protection is needed, use only protection authorized by 29 § CFR 1910.134, applicable U.S. State regulations, or the Canadian CAS Standard Z94.4-93 and applicable standards of Canadian Provinces, EC member State, or Australia.

Eye Protection: Avoid eye contact. Safety glasses with side shields should be used when handling large quantities (e.g., ≥ 1 gallon) of this product.

Hand Protection: None required under normal conditions of use. However, may cause skin irritation in some sensitive individuals. When handling large quantities (e.g., ≥ 1 gallon), wear rubber or impervious plastic gloves.

Body Protection: No apron required when handling small quantities. When handling large quantities (e.g., ≥ 1 gallon), eye wash stations and deluge shower should be available. Upon completion of work activities involving large quantities of this product, wash any exposed areas thoroughly with soap and water.

Section 3 Hazard Identification

Emergency Overview: Warning: Flammable. Contents under pressure. Container may burst if heated. Do not place in hot water, or near radiators, stoves or other sources of heat. Do not puncture or incinerate container or store at temperature over 120 degrees F. Do not use in presence of open flame or spark or other sources of ignition. KEEP OUT OF REACH OF CHILDREN. Avoid getting into eyes. Use only as directed. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

Potential Health Effects:

Eye Contact: Contact may cause mild eye irritation including stinging, watering, and redness.

Skin Contact: Practically non-irritating to skin. Prolonged or repeated contact may result in deflating and drying to the skin which may result in skin irritation and dermatitis.

Inhalation: Contains asphyxiant gases. Intentional inhalation of gases may cause headache, fatigue, weakness, overexposure may produce more serious symptoms, including coma and death.

Ingestion: No harmful or chronic effects are expected to occur from a single accidental ingestion. Intentional and continuous ingestion can cause serious effects on liver and kidney. Contains denatured alcohol.

Chronic effects: None when used as directed.

Section 4. First Aid Measures

Eye: Flush or rinse eye with tempered water while holding eyelid open. Remove contact lenses, if worn. If irritation or redness persists seek medical attention.

Skin: Clean affected area(s) thoroughly by washing with mild soap and water, pat dry. If irritation or redness develops and persists, seek medical attention.

Inhalation: If breathing difficulties develop, move victim away from source of exposure and into fresh air, give oxygen as necessary. Seek immediate medical attention.

Ingestion: **DO NOT** induce vomiting. Have a conscious person drink two glasses of water. Seek medical attention.

Page Break

Section 5. Fire Fighting Measures

Flammability Classification: Flammable pursuant to CFR 16, Ch II Subchapter C, part 1500.45.

Aerosol Level: Aerosol Level 2 (REF: to NFPA 30B, Section 1-7 of August 6, 1998). Code for the Manufacture and Storage of Aerosol Products.

Unusual Fire & Explosion Hazards: Aerosols may burst at temperatures above 120 degrees F. Contents under pressure. Cool uninvolved containers to prevent possible bursting.

Extinguishing Media: Use extinguishing agent suitable for type of surrounding fire.

Fire Fighting Instructions: The use of self-contained breathing apparatus is recommended for fire fighters. Fight fire upwind. Containers exposed to intense heat from fires must be cooled with water to prevent vapor pressure buildup which could result in container rupture. Keep containers cooled with water and remove them from danger if it can be done with minimal risk. Aerosols can be projectiles when bursting. If aerosols are bursting, stay clear until bursting is complete.

Section 6. Accidental Release Measures

Large spills:

Keep sources of ignition and hot metal surfaces isolated from spill. Stay upwind and away from spill/release. Isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Wear appropriate protective equipment including respiratory protection as conditions warrant. Water may be useful in minimizing or dispersing vapors. Keep out of water supplies.

Section 7. Handling and Storage

Handling: Contents under pressure. Handle as to avoid puncturing container(s). When used as intended, no additional protective equipment is necessary. Use chemical goggles if likelihood of eye contact. Wash unintentional residue with soap and water.

Storage: Store aerosol containers in cool, dry, well-ventilated areas away from heat and direct sunlight. Avoid temperatures above 120 degrees F. Keep away from any incompatible material (see section 10). Protect container(s) against physical damage. To avoid unintentional spraying keep protective cap in place when not in use.

Section 8. Exposure Controls/Personal Protection

Engineering Controls: A well ventilated room with adequate air circulation. Use local and general exhaust ventilation to effectively remove and prevent buildup of vapors/mist generated from the handling of this product.

Respiratory: If used with adequate ventilation, no protective equipment is necessary.

Skin: Not required based on the hazard of the material.

Eye/Face: While contact with this material is not expected to cause appreciable irritation, the use of approved eye protection to safeguard against potential eye contact is considered good practice.

Other Protective Equipment: A source of clean water should be available in the work area for flushing eyes and skin. Impervious clothing should be worn as needed.
